EARLY CHILDHOOD EDUCATION

.....
"For our family, the YMCA's Early Childhood Education Center has been a godsend! The administrators are compassionate and supportive. I've appreciated the diversity offered from the teachers to the children in the program. The YMCA's commitment to community engagement ensures that children of different races and socio-economic status are given the same opportunities in the same nurturing environment.

I cannot overemphasize the value our family has found in the YMCA Early Childhood Education Center program. The facilities are second to none, the teachers are loving, the community is enriching, and the program is exceptional."

“There just aren’t enough words to summarize the great experience that my son had at YMCA Nature Preschool. It’s exciting when your child wakes up every day eager to go to school and learn. The best part about it was that he didn’t realize he was learning at all! I would highly recommend this program to anyone who is looking; you certainly won’t be disappointed!”

SWIMMING

STAGE DESCRIPTIONS

SWIM STARTERS

Accompanied by a parent, infants and toddlers learn to be comfortable in the water and develop swim readiness skills through fun and confidence-building experiences, while parents learn about water safety, drowning prevention, and the importance of supervision.

A / WATER DISCOVERY
Parents accompany children in stage A, which introduces infants and toddlers to the aquatic environment through exploration and encourages them to enjoy themselves while learning about the water.

B / WATER EXPLORATION
In stage B, parents work with their children to explore body positions, floating, blowing bubbles, and fundamental safety and aquatic skills.

SWIM BASICS

Students learn personal water safety and achieve basic swimming competency by learning two benchmark skills:

- Swim, float, swim—sequencing front glide, roll, back float, roll, front glide, and exit
- Jump, push, turn, grab

1 / WATER ACCLIMATION
Students develop comfort with underwater exploration and learn to safely exit in the event of falling into a body of water in stage 1. This stage lays the foundation that allows for a student's future progress in swimming.

2 / WATER MOVEMENT
In stage 2, students focus on body position and control, directional change, and forward movement in the water while also continuing to practice how to safely exit in the event of falling into a body of water.

3 / WATER STAMINA
In stage 3, students learn how to swim to safety from a longer distance than in previous stages in the event of falling into a body of water. This stage also introduces rhythmic breathing and integrated arm and leg action.

SWIM STROKES

Having mastered the fundamentals, students learn additional water safety skills and build stroke technique, developing skills that prevent chronic disease, increase social-emotional and cognitive well-being, and foster a lifetime of physical activity.

4 / STROKE INTRODUCTION
Students in stage 4 develop stroke technique in front crawl and back crawl and learn the breaststroke kick and butterfly kick. Water safety is reinforced through treading water and elementary backstroke.

5 / STROKE DEVELOPMENT
Students in stage 5 work on stroke technique and learn all major competitive strokes. The emphasis on water safety continues through treading water and sidestroke.

6 / STROKE MECHANICS
In stage 6, students refine stroke technique on all major competitive strokes, learn about competitive swimming, and discover how to incorporate swimming into a healthy lifestyle.

Miracle League baseball is played on a custom-designed field featuring a cushioned, rubberized, completely flat surface to prevent injuries and allow access for the visually impaired and those in wheelchairs. All areas of the field, including the dugouts and restrooms, are universally accessible.

All players have a one-on-one "Buddy" to assist them on and off the field; parents and caregivers get to enjoy the game from the stands.

NEW! MOVING FOR BETTER BALANCE

Moving For Better Balance is a 12-week evidence-based group exercise program developed by researchers at the Oregon Research Institute. The program, based on the principles of Tai Chi, is led by a qualified instructor and teaches eight movements modified especially for falls prevention.

Moving For Better Balance takes place in a safe and supportive group setting and includes two class sessions and two-plus hours of at-home practice per week.

The program works to improve balance, muscle strength, flexibility and mobility to enhance overall physical health, which leads to better functioning in daily activities. Participation in the program may also result in better mental health, reduced stress, improved memory and cognition, and increased self-esteem.

In addition to the program's physical benefits, the safe, supportive group setting provides an opportunity for participants to enjoy learning with like-minded adults and find relief from the isolation that can sometimes come from living with limited mobility.

HEALTHY LIVING

COMING SOON! BLOOD PRESSURE SELF-MONITORING PROGRAM

Take Action to Improve Heart Health

This evidence-based initiative emphasizes that self-monitoring and tracking can play a significant role in reducing blood pressure and improving quality of life. Participants work with trained Healthy Heart Ambassadors for the duration of the four-month program to take their own blood pressure at least two times per month, attend two monthly consultations and attend monthly nutrition education seminars. Goals include increasing awareness of triggers and teaching better management practices. YMCA Healthy Heart Ambassadors are trained in proper blood pressure measurement and provide participants with blood pressure monitors approved by the American Heart Association.

According to the American Heart Association, nearly 80 million American adults have high blood pressure, and less than half have it under control. High blood pressure is a key, modifiable, risk factor for both heart disease and stroke, which are two of the leading causes of death in the United States. In an effort to address these issues, the Y designed a self-monitoring program.

ENHANCE® FITNESS

Modified Moves, Maximum Results

This proven, nationally recognized senior fitness and arthritis management program helps older adults become more active, energized and empowered for independent living. A trained and certified instructor focuses participants on cardiovascular endurance, strength, flexibility and balance in an atmosphere of social interaction to reduce the severity of arthritis symptoms.

Participants set their own goals and never do anything that hurts! Soft, adjustable wrist and ankle weights allow each participant to perform strength training exercises at an appropriate level. We measure success with a personal fitness assessment every four months and track progress over time. At the Y, we also provide a comfortable, welcoming environment where participants can support each other and engage socially, breaking the social isolation that is detrimental to the health of many older adults.

YMCA'S DIABETES PREVENTION PROGRAM

CHANGE TODAY FOR A HEALTHIER FUTURE

You can reduce your risk for type 2 diabetes and gain tools for healthy living.

DID YOU KNOW?

- About 86 million American adults have prediabetes, up from 79 million in 2010.
- People with prediabetes are likely to develop type 2 diabetes within 10 years, unless they take action to prevent or delay the disease.
- Diabetes is a leading cause of heart disease, stroke, blindness, disease and nerve disease

THE GOOD NEWS...Lifestyle changes such as eating healthier, increasing physical activity and losing 7% of your weight can prevent or delay development of type 2 diabetes in those at high risk for the disease. With the YMCA's Diabetes Prevention Program, you can work with others in a small group setting to learn how to adopt habits that will improve your overall health and well-being and reduce your risk. The program, which is led by a trained Lifestyle Coach in a classroom setting, is delivered over a 12-month period, beginning with 16 weekly sessions transitioning to bi-weekly then monthly maintenance.

YMCA CAMP MINIKANI

WHERE STORIES BEGIN

Between two natural lakes on 150 pristine acres, YMCA Camp Minikani is a place where campers canoe and swim; build fires and friendships; try archery and explore the arts. However, camp is much more than a series of activities or a plot of beautiful land. Minikani is a community that is dedicated to inspiring your child's best self.

As parents we want to give our children every opportunity to grow and develop into the best people they can be. We strive to give them the skills they need to be independent and make good choices. But we can't do it alone. It's the community with whom we surround our kids that makes all the difference. Teachers, pastors, coaches, family and friends create the environment to help us raise good kids.

Summer camp is one of those unique settings that provides positive role models who help shape a child's character. It's an environment where kids from all walks of life come together and learn how to not only get along, but develop deep friendships and mutual respect. Summer camp encourages children to express their

individuality and stretch beyond what they thought possible.

Under the thoughtful guidance of our carefully trained counselors and staff, children become more independent, develop problem-solving skills and learn how to rely on their own decisions. And the bonus? Kids have TONS of fun.

Camp Minikani offerings include Overnight Camp, Day Camp, Equestrian Camp and year-round Equestrian and Environmental Education programming—all just 30 minutes from downtown Milwaukee. Summer camp is one of the greatest gifts you can give your children. We hope you'll consider a week or two of camp this summer.

Registration for summer 2019 will open in September.
